

Custom Armless Furniture covers

How to measure:

Please remove all cushions when measuring.

A - Enter total Length of the seat left to right tip to tip at widest point.

B - Back Depth - Measure maximum thickness of back at the top.

C - Top Length - Total length of the back at the top at widest point.

D - Base Depth - Measure distance from the back to the front at seat level.

E - Base Height - Measure distance from the top to the floor.

E1 - Desired Height of skirt. For full skirt enter same as Dim. E.

F - Seat Depth - Distance from to the back of the seat at the widest point.

G - Back Height - Measure height of the back. (at highest point, usually in center of furniture)

For accurate measurement: Push furniture against the wall and measure from furniture base up around the back to point where the back touches the wall. *(Please Note: Combined sum of Dim. "G" and "I" should equal to Dim. L)*

H - Back Depth - Measure maximum thickness of back cushion at the seat level.

I - Back Height - At the highest point. (Usually in a center of the couch). For accurate measurement: Push furniture against the wall and measure from floor up to point where the back touches the wall. *(Please Note: Combined sum of Dim. "G" and "I" should equal to Dim. L)*

J - Base Height - Distance from floor to where the seat and back meet.

K - Back Length - Length of the back left to right tip to tip at widest point.

L - Back Overlay. - Measure from furniture base, over the back, down to the floor. (at highest point, usually in center of furniture).

M - Back Height - Maximum back height from top to bottom.
