

Made to fit square, rectangular, T cushions, trapezoid and diamond shape cushions with boxed corners. Ideal for [furniture cushions](#), [floor cushions](#), [pet beds](#), [patio cushions](#), etc. Features concealed zippered construction.

**\*Words of Wisdom\*** : If you have more than one cushion on your furniture, you may consider covering them all with one cover, by simply combining the length of all the cushions. This will save you a lot of money too. Please note: these covers are not made with piping or trimmings.

**Note:** When purchasing Square and Rectangular shaped cushions, you have an option of selecting zipper location. All other shapes are made with predetermined zipper location.

**Lead Time:** All custom box corner covers are shipped within one week.

**Price includes:** Our fabric and labor.

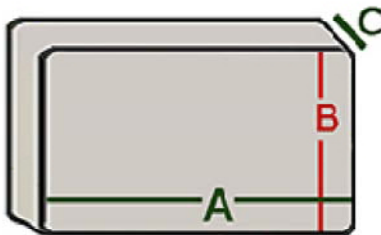

**General Measuring Tips:**

Always measure seam to seam. For perfect result use soft tailors measuring tape to accommodate for puffiness. Measuring with yard stick, metal tape: remove stuffing, place cover on flat surface, measure seam to seam.

**Measuring and selecting Zipper Location for Rectangular or Square Cushion:**

**Rule of thumb** Rectangular and Square cushions:  
When facing your furniture, measure your dimension "A" left to right. Therefore in order for zipper not to show, select "A Wrap" for zipper location.

Wrap along dimension A

**Square & Rectangle Cushion:**

- A** = Length of cushion (Left to right)
- B** = Width of cushion
- C** = Thickness of cushion

The zipper is installed across the long "A" dimension of the cover and goes around each corner and up the dimension "B" several inches.

Along both dimensions A & B

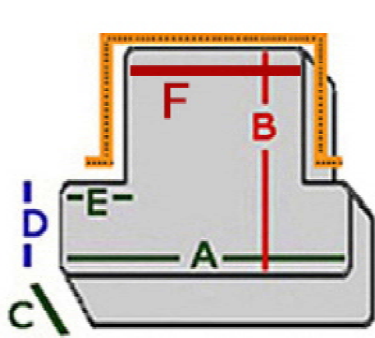

Wrap along dimension B

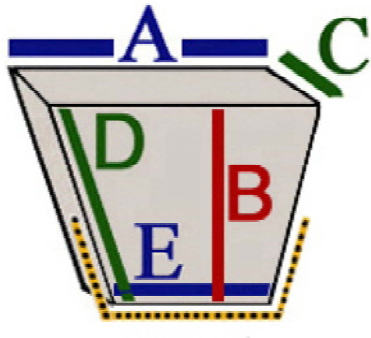

The zipper is installed across the length and width side and stops at the corners.

The zipper is installed along "B" dimension of the cover and up the dimension "A" several inches.

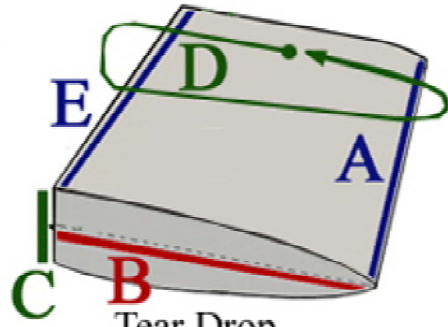

**Shapes below have predetermined zipper location:**
